

PRODUCTION-ORDER-BASED

Sequence Delivery

THE CLIENT

The client is one of the world's leading manufacturers of agricultural, construction, and forestry equipment. It is a Fortune 500 company with factories, plants, offices, and other facilities in more than 30 countries worldwide.

THE CHALLENGE

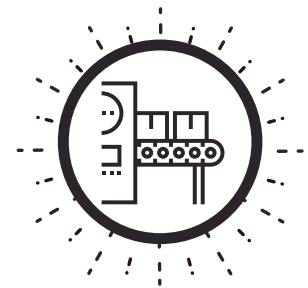

The client was faced with the following challenges:

Inefficient raw material handling

High inventory carrying costs

Delays in production order execution

THE SOLUTION

SBP Consulting engaged with the client at the blue printing stage and developed a solution that enabled the client to:

Implement production-order-based raw material procurement

Automatically trigger raw material procurement based on production order quantities

Communicate ASNs to the Supplier along with production order numbers

Tie incoming raw material inventories to production orders

Obtain a Planner's Dashboard that reflects the status of the inventory and production order for scheduling

BUSINESS BENEFITS

Improved transparency and traceability of raw material inventory

Reduced raw material inventory, truck traffic, and inventory handling

Minimized overhead cost
